County Employment and Wages in Wisconsin — Third Quarter 2016

Wisconsin's six large counties had employment increases from September 2015 to September 2016, the U.S. Bureau of Labor Statistics reported today. (Large counties are defined as those with 2015 annual average employment levels of 75,000 or more.) Dane County had the largest increase, up 2.6 percent, followed by Winnebago County, up 2.0 percent. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the employment gains in four of the state's large counties were less than the national increase of 1.7 percent. (See [table 1](#).)

Among the six large counties in Wisconsin, employment was highest in Milwaukee (487,000) in September 2016, followed by Dane (330,700), and Waukesha (239,000). Each of the three other counties—Brown, Outagamie, and Winnebago—had employment levels of less than 155,000. Collectively, Wisconsin's six large counties accounted for 49.5 percent of total employment within the state. Nationwide, the 344 largest counties made up 72.5 percent of total U.S. employment.

The average weekly wage in Dane County rose 10.1 percent from the third quarter of 2015 to the third quarter of 2016, the largest increase among Wisconsin's large counties, followed by Brown and Waukesha Counties at 6.7 percent and 5.2 percent, respectively. Dane County had the highest average weekly wage in the state at \$1,032, followed by Waukesha County at \$1,006 and Milwaukee County at \$970. (See [table 1](#).) Nationally, the average weekly wage rose 5.4 percent over the year to \$1,027 in the third quarter of 2016.

Employment and wage levels (but not over-the-year changes) are also available for the 66 counties in Wisconsin with employment below 75,000. All of these smaller counties had average weekly wages below the national average. (See [table 2](#).)

Large county wage changes

Two of Wisconsin's six large counties recorded wage gains greater than the national increase of 5.4 percent from the third quarter of 2015 to the third quarter of 2016. (See [table 1](#).) As noted, Dane County had the state's largest average weekly wage increase, up 10.1 percent, and ranked seventh among the 344 largest U.S. counties. The over-the-year wage gain in Brown County, at 6.7 percent, ranked 79th nationally. The four remaining counties had average weekly wage increases ranging from 5.2 to 4.4 percent.

Nationally, 339 of the 344 largest counties registered over-the-year wage increases. Clark, Nev., had the largest wage gain, up 12.2 percent from the third quarter of 2015. Manatee, Fla., was second with a wage increase of 10.7 percent, followed by Hillsborough, N.H. (10.4 percent); and Boone, Ky., and Elkhart, Ind. (10.3 percent each).

Among the largest U.S. counties, five experienced over-the-year wage decreases. Rockland, N.Y., had the largest wage decrease with a loss of 14.9 percent. Lafayette, La., had the second largest decrease in average weekly wages, down 3.4 percent from the third quarter 2015, followed by Benton, Ark. (-2.0 percent); Lake, Ill. (-0.9 percent); and Midland, Texas (-0.3 percent).

Large county average weekly wages

Average weekly wages in five of Wisconsin's six largest counties were below the national average of \$1,027 in the third quarter of 2016. As noted, Dane County (\$1,032) had the highest average weekly wage in the state, ranking 98th among the 344 largest U.S. counties. Waukesha (\$1,006) and Milwaukee (\$970) Counties placed 118th and 153rd, respectively. The state's remaining large counties had average weekly wages that placed in the bottom half of the national ranking.

Nationwide, average weekly wages were at or above the U.S. average (\$1,027) in 103 of the 344 largest counties in the third quarter of 2016. Santa Clara, Calif., recorded the highest average weekly wage at \$2,260, followed by San Mateo, Calif. (\$2,098); San Francisco, Calif. (\$1,892); New York, N.Y. (\$1,879); and Washington, D.C. (\$1,728).

Among the largest U.S. counties, 241 had weekly wages below the national average in the third quarter of 2016. Horry County, S.C. (\$632) reported the lowest wage, followed by Cameron, Texas (\$636); Hidalgo, Texas (\$654); and Webb, Texas (\$680).

Average weekly wages in Wisconsin's smaller counties

Of the 66 counties in Wisconsin with employment below 75,000, Racine County had the highest average weekly wage at \$896. Florence County had the lowest weekly wage at \$528, followed by Bayfield at \$542. (See [table 2.](#))

When all 72 counties in Wisconsin were considered, 14 reported average weekly wages of \$649 or lower, 29 had wages from \$650 to \$749, 18 had wages from \$750 to \$849, and 11 had wages of \$850 or higher. (See [chart 1.](#))

Additional statistics and other information

Quarterly data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit the QCEW Web site at www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2015 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2016 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2015* are now available online at www.bls.gov/cew/cewbultn15.htm. The 2016 edition of *Employment and Wages Annual Averages Online* will be available in September 2017.

The County Employment and Wages release for fourth quarter 2016 is scheduled to be released on Wednesday, June 7, 2017.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 9.8 million employer reports cover 142.9 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at www.bls.gov/cew; however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Covered employment and wages in the United States and the 6 largest counties in Wisconsin, third quarter 2016

Winnebago, Wis.	93.1	2.0	142	924	190	4.4	262

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
